Programming Skillsets: Implementing APIs, responsive design, front- end & back-end development, mobile development, product design, UI/UX, wire-framing, version control (Git)

EXPERIENCE

Fortnite Tracker

- With a team of two others we created a statistics comparison application using a Fortnite API.
- This communicated with on API to grab multiple statistics from different players which also allows players to compare their stats with each other to see who is the better overall player.

Food Recipes

- This project is based primarily on making cooking easier for the user experience, by looking up a dish/ ingredients of their desired choice.
- Multiple api's are implemented to pull names, ingredients, images, and cooking times of a various amount of dishes.

504 Sports

- This project was created for a local high-schools website that mainly focused on recent sport updates.
- That indicated it will help users get recent updates on schedules for games, as well as scores, and pictures.
