Full Stack Developer Academy that taught LAMP Stack

The University of Texas Rio Grande Valley, Edinburg, TX   Degree received: May 2012
Bachelor of Business Administration in International Business
Minor: Global Security

SKILLS

HTML, CSS, PHP, Javascript, jQuery, MySQL, Laravel, AngularJS, Git, RESTful APIs, JSON, LAMP Stack

PROJECTS

504 Sports: Local high school sports website requested a redesign
- Used bootstrap4, and modern design techniques
- Site uses more html5 and animation

Fortnite Tracker: Companion app for players of the game Fortnite
- Uses the Fortnite video game's API to allow user to compare his/her game statistics with friends
- Makes use of Laravel, jQuery, PHP, HTML5, CSS

Compfinder: App to assist Real Estate Agents and Investors in finding comparable properties
- Used 2 APIs from Zillow.com to allow the user to find comparable real estate properties relative to the address typed in by the user. An investment recommendation is made based on the price per square foot of the property compared to the average price per square foot of the comparables
- Created a custom loan payment calculator that automatically uses the value of the searched property
- Makes use of Laravel, PHP, HTML5, CSS

FaceApp: App that provides basic analysis of a person's face
- Uses Imgur API and Face++ API to allow user to upload a picture of their face and see analysis
- Allows users to register, login, and change account settings
- MySQL database stores previously uploaded photo URLs and analysis of photos
